

Features:

SUPPORTED:

- Single transfers (read / write), SINGLE burst (HBURST = 000)
- Fixed-length incrementing bursts: INCR4, INCR8, INCR16 (HBURST = 011 / 101 / 111)
- Waited transfers (HREADY-based wait-state insertion by the slave)
- 32-bit data bus, HSIZE fixed to WORD
- HRESP OKAY / ERROR detection, with burst abort on ERROR

NOT SUPPORTED

- HMASTLOCK / locked transfers
- HPROT / protection control signals
- Master-inserted BUSY transfers
- Wrapping bursts (WRAP4/8/16)
- Undefined-length INCR bursts
- Data bus widths other than 32 bits
- Multi-layer / multi-master arbitration
